## ***News Release***

### ***Blind Creek Amends Property Agreement with BCGold***

August 12, 2014

Vancouver, BC – Blind Creek Resources Ltd. (TSX-V: BCK) ("the Company" or "Blind Creek") reports that BCGold and the Company have amended the Blind Creek Letter Agreement, under which BCGold may earn up to a 100% interest in the Blind Creek property (see August 19, 2013 news release). The amendment, subject to TSX Venture Exchange approval, includes the following:

- Each of BCGold's annual option commitments over four years, totalling \$400,000 in eligible exploration expenses, issuance of 1,000,000 BCGold common shares, and cash payments of \$225,000 to Blind Creek, are extended by one year.
- In consideration of the above, BCGold will issue 100,000 common shares to Blind Creek 15 days after receipt of Exchange approval of the amendment.

#### *About the Blind Creek Property*

The Blind Creek property is situated adjacent to BCGold's 100% owned historic Engineer Mine property, located 32 km southwest of Atlin, B.C. The 1,105 ha property overlays the southeastern extensions of two shear structures (Shear A and Shear B) that are known to host broad zones of gold-bearing hydrothermal breccias on the Engineer Mine property. The Blind Creek property also partially overlays an untested 250-m wide, circular magnetic high and coincidental gold and arsenic-in-soil anomaly, flanked by a 1,000-m-long resistivity high and occurring at the intersection of the Shear A and Shear B structures. These features are believed to represent a near-surface intrusion and gold-bearing alteration envelope, and possible core of the Engineer Mine epithermal gold mineralizing system.

BCGold field crews will conduct a limited summer work program of additional soil sampling, geological mapping and prospecting, to further qualify the nature of these anomalies later this summer. BCGold is positioning itself to drill test this target when better market conditions prevail.

On behalf of the Board of Directors,
